Good Afternoon,

I appreciate having the opportunity to support the Tillman Trail Connectivity Project in the George Washington National Forest. In a time of social distance traveling and vacationing, outdoor recreation amenities are key in promoting our destination throughout the year. By enhancing the Tillman Trail and Tillman Road corridor, this will allow additional visitors and residents to enjoy all that there is to offer in the national forest. By offering additional trails in the forest, our community will be able to create even more ease of access for bikers that are beginners as well as enjoy a leisurely trail for more experienced riders. The Narrowback Mountain trail system for intermediate and beginner trail visitors will also be another trail that will be a draw for our community and the central Shenandoah Valley.

Not only will the trail improvements be a draw for tourism in our community, they will help create a healthier lifestyle for residents looking to enjoy the great outdoors and the amenities that are simply in our back yards.

Thanks,

Joshua Gooden
