Comments:

This project has my full support. The Tillman Road Corridor is an area that lends itself to new trail users both in our area as well as visitors. This project will utilize an existing parking area to gain access to a vast beginner/intermediate trail network while while reducing vehicular, bicycle, horse and foot traffic on Tillman Road. Outdoor recreation has grown tremendously in our National Forest and this project and others like it fill a true need in our area. Outdoor recreation is extremely important for the physical, mental and social health for many people. I have witnessed exponential growth in usage of our public lands and believe this growth trend will continue. This is why I believe this project is so important. Thank you for your consideration.
