Comments:

Hi there,

I fully support relocation legacy trails and creation of new trails along the Tillman Road corridor. Creating a new trail connecting the Narrowback/Tillman west area with Wolf Ridge trailhead would cut down on bike traffic along Tillman and create more beginner/intermediate friendly trails in the area. This would give access to more users. This North River and GW Forest along Tillman is becoming an epicenter for mountain bikers. Mountain biking is gaining popularity and this area is easily accessible to people from all directions.

Thank you for your consideration.

Andrew Mills
