Comments:

I'm writing in support of building a new connector from Wolfe parking lot to the ridge trail at Narrowback. Such a trail would enable hikers and bikers to minimize their time on Tillman road, making for a safer environment for all. This is particularly true for those riding with children. Narrowback is a very important trail in the region because it offers intermediate riding and hiking opportunities; folks don't have to do significant climbing or descending and the trails there are not as technical as others in the area. These trails are among the most popular in the area and allowing for easier access (without a long gravel section) will allow riders to enjoy the natural resources right from the trailhead. These trails bring in riders from around the state (and beyond) because of their accessibility and we'd like Harrisonburg and the local areas to benefit from that tourism. Thanks for your consideration.
