Title:

Comments:

I am opposed to any mining in the drainage basin of the Salmon River, Idaho. This includes the South Fork, Middle Fork, and all creek and streams that feed into these rivers.

Mining is one of the more destructive activities of humans, essentially based on greed. In this case the purpose is to obtain gold so that some Canadian company can profit.

There is nothing good in this for the river, the environment, the wildlife, the flora, or the American people.

Please do not allow this to proceed.
