Comments:

I am writing in support of the proposed trail project on Narrowback Mountain. I am a frequent rider of the existing trails in this area. This new trail would definitely see a good deal of use and care from the mountain biking community. Situated at the edge of the National Forest makes Narrowback mountain more accessible to more users and requires less driving, making it an ideal location to develop trails. This trail will result in fewer mountain bikes on Tillman road, and in general, the North River district would benefit greatly from more connectable trails to help keep cyclists from needing to ride the roads in the area. I support the re-alignment of 'legacy' trails, which are sometimes overgrown or built unsustainably.

Thank you for reading,
Dane
