Title:

Comments:

The world owes me a living, but I have to work hard to get it. All wealth comes from air, water, and earth. I don't believe in polluting any of it.

I think Midas Gold has a good plan for digging wealth out of earth, providing good jobs, providing badly needed strategic minerals, while at the same time restoring habitat.

I too, like fish. As a kid some seventy-five years ago, I hated the looks of the muddy East Fork of the South Fork of the Salmon River when our family visited Stibnite. Back then Stibnite was vital, and today Stibnite is nearly as vital.

I highly recommend this Stibnite Project to the US Forest Service for all the aid they can render in moving it forward.

Thank You,  
Hugh Harden
