Comments:

The South Fork of the Salmon River is one of the most beautiful places I have ever been in my entire life. The mere idea of putting a gold mine in that area is nothing short of a catastrophe. We can do better than this as human beings. Yes, there will be TEMPORARY jobs gained from this project, but there will be PERMANENT damage done to one of the last truly wild and majestic places left in this country. Supporting this mine is supporting tyranny, evil, and destruction. The profits of very few should not impact the lives of so many others. This project is a bad idea and simply should not happen. Please, please, please do not ruin this river drainage with another short-sighted mining project. God Bless America.
