Comments:

I have read the propaganda put out by Midas Gold regarding their proposed Stibnite project. The promise of jobs (even if they hired only Idahoans), purchasing local service and supplies is complete nonsense. They are going to hire only their people (wherever they're from) who are already trained and knowledgeable. They are only going to purchase supplies that are cheapest.

As for the Environment, show me ONE mining project anywhere, that truly, truly cleaned up the site once they've stripped and polluted it to the maximum and beyond. Idaho does not need anymore mining projects that will pollute our lands, rivers and streams!

Please deny this project. Don't let this Canadian company or any other, come to our beautiful state, rape the land, and leave with the money. There is NO possible way that even "modern, sustainable practices" that they claim they would use, is ever going to put our state back to it's pristine status.
