I am writing to tell you that I strongly support the Tillman Trails Connectivity Project #58134 project. I personally would like to see new trail construction along the Tillman Road Corridor to increase both trail connectivity and the safety of bike riders along Tillman Road. The North River District of the George Washington National Forest is a wonderful place to ride mountain bikes but needs more trails. The Narrowback Mountain trail system is one of the only ones in George Washington National Forest that is friendly to beginner and intermediate riders, and it would benefit from an expansion of similar level trails. This project will also increase connectivity to other trails like Wolf and that will allow for longer trail rides. More riding and less driving to trails would be beneficial to the environment and riders' health. I urge you to approve this project.
