Hi,

I wanted to submit my support for the addition of this trail on narrowback and hopefully other trails in the area. I ride out in this area of the GWNF most weekends and it is a true gem. The only downside is that there are only a few trails in the area. This trail would create major single track connection and allow us to skip miles of gravel. Being able to make this connection on the trail is safer than riding the gravel roads. I do not know what else to say other than that I am an avid mountainbiker and that I fully support this project! Thank you.
