Sir/Madam

I write in support of the Tillman Trails Connectivity Project #58134. Additional intermediate level recreational hiking and biking trails in the Tillman road corridor would be a great asset and improvement to area trail users. Reducing traffic on the road combined with easy access close to the USFS boundary would be much appreciated by many users. With more and more people seeking outdoor recreation the addition of this project along with other proposed trail improvement projects will greatly improve the quality of life for generations to come.

Thank You for considering this project and others sponsored by the SVBC.

Respectfully,

Kenny Hess
