I am writing in support of Tillman Trails Connectivity Project #58134. The proposed additional trail will be an amazing addition to an already outstanding system of trails, connecting the Wolf parking lot with the Narrowback loop. It will provide a place for mountain bikers to ride other than the road when riding both the Wolf and Narrowback sections, keeping them safe from traffic on the narrow gravel Tillman Road. The additional trail will also provide family friendly beginner access in an area with many advanced trails.
