Title:

Comments:

I encourage additional trails and improving of existing trails in the Narrowback area.

1. Improved connectivity along Narrowback ridge via the new trail will help to reduce bike volume on the road.
2. create proper access for narrow back from wolf parking area during hunting season.
3. allow more people to enjoy the forest property thru easier front country trails (most steep uphill trails like sand spring are discouragingly difficult for beginners)

Thank you for great partnership with our outdoor community in GW, we have become a strong economic driver and source of support for conservation of our nations great forests!

Jeremiah Bishop
