Comments:

I am against the expansion of Grand Targhee into Teton Canyon- this is a special resource, a migration corridor for native cutthroat trout, and an important public access. To privatize this area would do a great harm. "Teton Creek is the most ecologically significant tributary and riparian area in the upper Teton Watershed that supports one of the last stronghold populations of Yellowstone Cutthroat Trout in their remaining range." Allowing a private company to turn this area into a zoo (ziplines, etc.) would be atrocious.
