Comments:

Thank you for the opportunity to comment. I can make it very short. I believe that all wilderness eligible federal lands should be managed for future official ("big W") Wilderness designation and management for the benefit of wildlife and man-kind. I don't believe that the US Forest Service in its present configuration will ever be motivated to do this unless it is reorganized within the Department of the Interior and -somehow- becomes credible and responsible to the public good of all citizens.
