Comments:

It is an outrage that the US Forest Service would even be entertaining this environmental disaster to enrich a few privileged people. The rules and regulations that we have to jump through as a wildland firefighter to impact the environment a minimally as possible while trying to contain a fire and the US Forest Service will allow for the destructive behavior of a goldmine to harmfully impact the Salmon? Who are you people? How did you get a job for the Forest Service? You should be stewards of our lands not the robber barons...!!!
