To whom it may concern,

The South Fork Salmon River has been a dream destination of mine for years. I have always wished for the opportunity to fish, paddle and float on these waters. I am concerned to hear that there are plans to put a gold mine near the headwaters of the Sout Fork Salmon river. Gold mines have a reputation for destroying the natural environment and polluting pristine areas. It would be a shame if this river were to be defiled for all of the current and future generations to come.

Regards,

Kenneth Rosecrance
