Comments:

I think I speak for many local and state wide mountain bike enthusiasts. We are all so discouraged by the coaster placement on this beautiful and fun terrain. I realize that mountain biking this terrain doesn't make money for anyone but it could if there was a concession area potentially shared by the coaster and mountain bikers. Please try hard to accommodate both the potential coaster and mountain bikers. Angel Fire has a great down hill park and many people from Albuquerque travel there to ride those trails. Why not try and do the same thing here?! Make a better mountain bike park and a coaster. This will bring in double the amount of people... maybe some great engineer can make the coaster travel over the trails in areas where they could intersect?! Please try and bring people to these trails for biking instead of pushing them away?! Allowing mountain bikes on the lifts would bring more people and allowing bikes on the team as well. There just seems to be other ways that can bring more people to the ski area that are under utilized!!!
