Comments:

I have just a couple things I would like say.

First, the young, the old, the disabled etc. all deserve to have access to their public lands. Wilderness is great but not everyone has horses or the ability to hike for miles. Balanced use should be BALANCED. Motorized use consistently is shorted. Please quit closing roads and locking so many excluding the healthy and wealthy out of their lands.

If trail maintenance is an issue, reach out to the various clubs and organizations! Mountain bikers, 4x4 clubs, motorcycle clubs etc. We would be more than happy to keep the trails in working condition. You have no problem using volunteers to keep hiking trails open. Enable us to do the same on a much larger scale.

Finally, why convert so many trails to 50" or less? Every single person in a Jeep I know packs out trash, clears the road etc. It isnt the guys in the full sized vehichles that are causing damage. If anything, it is the opposite.

I know this isn't in the format you guys desire. Just please take into account the rest of us when you are making our lands more and more inaccessible.
