Comments:

Thank you for all you do to preserve our national forests. It must be a truly difficult job with many challenges. Please, when you consider this proposal consider more than the "can we do this" and focus on should we do this. The decision to expand this facility impacts more than the forest, which I know you will do your very best to protect. We should be good stewards of the land and respect all creatures that make this land their home. But the impacts of this expansion have far reaching consequences into a community that may be unprepared to take on the challenges this expansion would bring. Let's not put the cart before the horse. I hope you find value in the comments the community provides so that you will have considered all impacts a proposal like this will bring. A compromise will be necessary to protect our natural resources for those not yet born, preserve a home for all creatures that are already challenged and find some room for the desires of a few.

Thank

John Norton
