Comments:

Mel Bolling,

I live in Alta Wyoming. I have grown up my whole life enjoying the beautiful mountains and Teton Canyon. I strongly oppose any expansion by Grand Targhee that moves toward and into parts of Teton Canyon. The effects on the wildlife could be devastating. We have a stunning scenic vista That millions enjoy. Massive expansion will ruin the beautiful mountains. There will be light pollution window reflection and more building structures that will ruin the beautiful nature that we have here. I think it's a real problem that the consultant for Grand Targhee is also doing the EIS for the forest service. As I live right on the road to Grand Targhee, I worry about the traffic complications. Traffic will become a huge issue in this quiet beautiful neighborhood. We have a small Alta elementary school children and families are on the road frequently, we already have a real problem with speeding and dangerous driving in this area. Please turn down this proposal for expansion it is unnecessary and unwanted. Thank you.

Sincerely,

Janelle Mattson
