Title:

Comments:

I am opposed to GTR expansion into South Bowl, Teton Canyon or Mono Trees. This notion of expanding into these areas of public lands limits the use for only the Grand Targhee Resort customers. That's not what our Forest Service National Lands is all about. Also, the environmental impact of this proposal cannot be measured or contained in an 'impact' study. Its detrimental affects are far more reaching than we can imagine. Aren't we fatigued with the heaviest of heart with the gravity of continuous thoughtless environmental rape? Please do not allow GTR to expand into our public lands meant for everyone. These exquisite areas are to be ENJOYED by ALL.

In Championship of our public lands,

mac sullivan
