Comments:

I love to ski at GTR and have been for the past 20 years, things are very different in the past few years with massive traffic, full parking lots and plenty of users enjoying the mountain, this is a successful ski resort. The ski resort does need to upgrade its parking and dining services, on a packed weekend the services are overwhelmed and the lift lines can be long so adding a few lifts could help, the size of the requested expansion does not fit with the infrastructure of Teton Valley Idaho. I work in Jackson but live in Idaho and need to commute over the pass, over the past 20 years driving from the Jackson to Wilson can now be a 30-minute parking lot due to the JHMR traffic dumping on Hwy 22 and the growth of Jackson. The traffic situation in Teton Valley Idaho currently is horrible along Hwy 33, people can no longer pull out of the side roads and find an opening in the lines of traffic. If we add thousands of more cars to our roads you had better be prepared for a nice 45-minute drive between Victor and Driggs during rush hour traffic. Please consider the impact this will have on Teton Valley residents if this project is approved, there is no going back.
