Comments:

I would like to register my concern about the proposed Targhee expansion. I have been a pass holder at the area since 2003 and have watched and waited for improvements in skiable terrain since the previous expansion was approved. Not much has been done - though some basic amenities have been needed for sometime. A warming hut and something other than pit toilet would be good for the Peaked Mtn area. This area is especially popular on foggy, windy days and could use some amenities. But major expansion into the forest/canyon floor seems ludicrous at best. Seeking crowds to equal Vail?

Any parking or improved transit issues addressed? How about disruption of wildlife in Canyon area? Water for snowmaking? Where does the runoff wind up?

There are so many areas of impact for this expansion that I hope the powers that be are not swayed by slick corporate presentations or pressures. Teton Valley deserves a thorough, thoughtful sensitive examination of issues and consequences before anything further is approved.

Back to my original thought - how about fulfilling plans approved many years ago?

Thanks for your time.
