Comments:

We believe that Grand Targhee's proposed expansion should be limited in several areas. Teton Canyon is a recreational corridor on public lands that benefits all of us during all seasons. The proposed expansion with lifts serving the South Bowl and Mono trees would hinder that use... not to mention the wildlife and environmental concerns plus loss of solitude in an area that is already busy. We agree that expansion and new investment in Grand Targhee is needed, however, Teton Canyon and surrounding slopes should be off limits. We are not opposed to adding lifts on Peaked and Fred's as well as responsible development at the current base area. As far as mountain restaurants, we feel they should be designed to limit light pollution and fit into the landscape. Night skiing shouldn't be approved as lights on Peaked or Fred's would hurt the natural Teton views.

We live in Alta and are concerned about Ski Hill Road traffic. Can the road handle all the increased traffic without a major infrastructure investment in Ski Hill Road?
