Comments:

We will enjoy the additional ski area, especially on foggy days. Not certain we would enjoy the effort to upscale to match other destination resorts. The local community will be severely impacted by the increased traffic and services needed to support the larger crowd. Focus should be on transportation and better parking facilities as well as links to support the local businesses, such as a store/s in the complex that features goods and services from Teton Valley that customers can expand their purchases by going to town.
