Comments:

I support all of the requested expansions and improvements except 1

the south bowl of peeked expansion is a slight concern of mine I would like more information on how they are going to develop the lifts without them being visible from Teton canyon hiking trails and table mountain

If they can locate them where they will not be easily seen then I would be in favor of this also.

I also think that locating a mid mountain restaurant next to the Sacagawea lift is a mistake I believe locating it in the saddle where the current buffalo soldier bike trail is would be a much better location it could be hidden in the trees but still have a fantastic view of the Tetons

Thanks Squeak Melehes
