Comments:

I am writing to comment on the potential of opening up non motorized trails to use by e-bikes. I do not believe access should be allowed to e-bikes. I believe that non-motorized areas should be kept for non-motorized use thus maintaining the sanctity of the designation and intent for the use. I believe that allowing e-bikes is a dangerously slippery slope to changing access in more drastic and devastating ways. I believe that an e-bike should be considered motorized and not allowed, nor should language be changed to allow their use in these areas.
