Comments:

What is really needed in this area is better access to the abundance of NF we have. Access is very difficult do to overgrown roads and/or lack of maintenance on forestry roads. Hunter numbers are declining across the nation and 1 reason I believe is lack of ease of access. It is very difficult to get kids or older people in to access good places to enjoy our NF. I've seen roads built to gain access to timber only to let them grow up so bad after logging is finished that walking them is very difficult. We also need more game fields to provide food for the wildlife. Stands of white clover are perfect for the game and it is a perennial that will continue to grow year after year. After clear cutting an area some of it could be turned into game fields. Please consider these ideas as it will also have a positive impact on the economies of surrounding towns and cities. Thank you, Donald L Childs Jr.
