First name: ROBERT

Last name: PARKER

Organization:

Title:

Comments:

1. We need more restrooms that open to public 7 days a week all over the national forest.
2. More timber needs to be harvested, to many trees dying and wasting and local governments losing income from sales. More education is needed to teach people about timber being a renewable crop and increases the health of forest lands.
3. More drivable roads to access back country of national forest for senior citizens to hunt, fish and camp. Half of the population are not able to walk into remote areas.
4. With hunting being legal in national forest, hunters need a public firearm range to learn and practice safe and accurate firearm use in Pisgah National Forest. This could be paid for by NC Wildlife.
5. With so much of rivers and streams limited to catch and release, fly only, remote and difficult access, a more aggressive stocking program is needed for trout in Western North Carolina.
6. More hiking and walking trails are always in need of upkeep and maintenance.
7. Many areas of forest there is NO evidence where National Forest ENDS and private land starts. Better maintenance of boundaries is very much in need.
8. I feel that a weekly or yearly fee is needed to help finance the needs.
