To whom it may concern, I am writing today in reference to REC-080302-22-01 Aska Mountain Bike Trail System Improvements. The Great American Outdoors Act is a great opportunity to expand an already very popular, albeit technically advanced trail system, with beginner and intermediate trails for all to enjoy. The proposed project will also ease the parking congestion experienced at the Shady Falls and Deep Gap parking areas by helping to disperse the trail visitors among more parking areas. A beginner and intermediate trail system is greatly needed so that all visitors to the area can enjoy the great outdoors while indulging in clean air exercise.
