Comments:

I ask that the Forest Service reconsider the focus of Proposed Project 0803 Major Maintenance on Roads on the Chattahoochee NF, which currently focuses on projects within the Foothills Project.

The Foothills Project should have its own funding directly tied to the scoping of the Foothills Project.

Major road maintenance in the Chattahoochee NF funded with the Great American Outdoors Act should go towards high impact, high need existing maintenance needs throughout the District. The Foothills Project is located in lower elevations and already connected to roads maintained by county, state, and federal dollars. Additionally, timber sales in the Foothills Project should help fund other road maintenance projects.

The Great American Outdoors Act funding represents a unique opportunity to take care of deferred road maintenance throughout the District with otherwise low likelihood of funding.

Thank you.
