Comments:

Thank you for providing this opportunity to provide feedback on projects funded by the Great American Outdoors Act (GAOA).

I support projects that deal directly with recreational use of land within the Daniel Boone National Forest, including such items as improving access to roads to recreational areas, trail work and campground rehabilitation at Bee Rock and Castlerock campgrounds.

Funding proposals that I feel are not appropriate for GAOA funding include: 1) maintenance for logging roads; 2) studies for such items as recreational planning processes; 3) deferred maintenance on offices.

Funding provided by GAOA should be prioritized for projects that directly impact people's use of outdoor spaces.

Sincerely,

Mark Berman
