In regards to conasauga campground and recreation area . The water system I had been broken four years with only a small portion of it working . The picnic and rest room facilities have been out of order for three years .people have to walk half way around lake to go to restroom . There is no water in that area at all.the grounds at camp ground and swimming area and swimming are are not kept up very well.these things should be top priority to be fixed .thank you we have been using this facility for 40 years .we we like to see it better taken care of . The roads are in bad shape . Thank you for allowing me to foment.
