Comments:

Max Patch is such a popular place that needs some major improvements to keep it from further degradation. Besides a parking lot expansion, there really needs to be toilets (ideally like the composting toilets that exist at Water Rock Knob on the Blue Ridge Pkwy). My husband and I have enjoyed hiking there and bringing visiting family there, but even though we live only 20 minutes away, it is really unaccommodating that Max Patch has no facilities. So many folks come from far away that having no toilets affects the experience negatively, and it is disgusting to have human waste and trash all over the land. Seems like camping permits might be a good way to start limiting the overuse too. Max Patch absolutely NEEDS extra parking space and toilet facilities to make it desirable as a tourist and local WNC attraction. Max patch is so valuable and beautifully unique, it must be positively improved for people to visit and appreciate. Thank you.
