Comments:

Thank you for this opportunity to comment. Regarding deferred maintenance and GAOA funding, please apply funds from the GAOA to the projects that need it the most. Namely repairing roads at high elevations and roads that are most damaged. Roads currently designated in the Foothills Project for repair should not receive funds from this new GAOA funding stream. Please apply the new money to projects that best prevent environmental damage from silt runoff and resource abuse. Apply the funds to needed projects that currently will not be funded by timber sales and other project budgets.
