Comments:

In regards to the Forest Service's proposed Mountain Coaster project in the Sandia Mountains Ski Area, I am opposed to it. First, this project should definitely not be excluded from an Environmental Impact Assessment. Second, this coaster brings in a Disneyland ambience and disrupts the native habitat with more noise and disruption of the quiet of trails, animal sightings and being in nature. We do not need more rides and entertainment in this small ski area nor in the larger Sandia Mountains. Let's get back to nature, not obliterate it.
