Title:

Comments:

The main concerns I have about this project are that an EA or EIS might not be conducted to determine the impact this project would have on the health of the surrounding ecosystem, and that the people of Sandia Pueblo have not been sufficiently consulted on what this project would mean for the mountain they hold sacred. By conducting an EA or an EIS and working with the people of Sandia Pueblo, this project would have greater public confidence. It is also the right thing to do.
