Comments:

I just found out about the proposed roller coaster planned for the Sandia Mountains. As a resident of Albuquerque, this is one of my family's favorite places to hike and enjoy the mountains incredible quiet beauty. I am very concerned about the increased fire risk of such a project as well noise and air pollution from all the additional cars. It would turn a beautiful hiking area into a polluted, loud, fun zone :(There must be another option to place a roller coaster that is not this one. that Please protect our beautiful mountain. Thank you so much for your work in the Forest Service.
