Comments:

I wholeheartedly support this project, 100%...not everyone can ski, mountain bike or even hike, and this would give access to our beautiful mountains to a wider variety of people, my daughter included. she has cerebral palsy, while mild and she can walk short distances, this would let her experience the mountains in a way she could not otherwise, more similar to the way others do.

There are obvious other benefits as well, more activities for our families, increased tourism, and increased economic activity both at the ski hill and in the east mountain community.

The hypocrisy of people saying it will ruin the ski area or the views is frustrating...not everyone skis, and the ski area has already affected the views, the impact of the mountain coaster would be negligible.

We need to provide the opportunity for all types of ppl of all interest and physical abilities to enjoy the beauty of nature and the Sandia Mountain Coaster does just that.
