Comments:

I know the comment period for this project is past. But for what it is worth I would like to submit these comments on this proposed project.

We are residents of the East Mountains since early 1980's. We hike and ski on the Sandia's, and we have looked over the project documentation, so with that background:

1. My wife and I both believe this proposed project is worthwhile to pursue and should be granted approval to proceed.
2. We agree with the goals and needs of the project. It would open the mountain experience up to a larger population with actually minimal impact to the overall mountain environment.
3. The only suggestion we can come up with is if it possible to minimize the closure to parts of Fred's run by shaving some trees off the top of the north tree boundary of the run to allow for skiers to continue to use that run.
